

Mospivo, a brewery situated in the Moscow Region, have been using our TourAudio TWG radio systems in its tours of their super-modern production facilities for the past 2 years. A video-review of this tour was recently made by one of the visitors and posted on the web.

Click [<<here>>](#) to see the full photo-report on the tour of the production facilities at the brewery.

These photos clearly demonstrate how our radio systems enable visitors to get closely acquainted with the beer production technology without missing a word from their tour guide.
