

We have recently finished a state contract for the supply of 360 TourAudio TWG radio guide units for the State Historical, Architectural, Art and Landscape Museum and Memorial Estate "Tsaritsyno".

Under this contract, a system of 12 [TourAudio TWG](#) sets was supplied, including a total of 360 [TourAudio TWG-16R](#) receivers.

TourAudio TWG radio guides are designed to improve the quality of sightseeing tours in the "Tsaritsyno" State Historical Museum.

Before choosing TourAudio TWG radio guide systems, the Museum employees carried out a serious market research study of Russian tour guide radio systems. TourAudio TWG was selected as the undisputed leaders of this research based on cost, technical specifications, usability, and the quality of service.

An additional argument in favor of TourAudio TWG radio guide systems was the successful year and a half experience of its use in sightseeing tours that are given on Segway electro-scooters in the "Tsaritsyno" State Historical Museum.

Visit the official website of "Tsaritsyno" State Museum-Estate to learn more about this remarkable architectural monument with a complicated historical destiny: <http://www.tsaritsyno.net/ru/>
